

FPS Environmental Policy

At FPS, we are committed to reducing our environmental impact and promoting sustainable practices. We recognize the importance of addressing key environmental issues, and we strive to integrate environmental considerations into all aspects of our business operations. This environmental policy outlines our commitment and provides a framework for action across various areas of concern.

Energy Consumption and Greenhouse Gases:

- We actively monitor and reduce our energy consumption by implementing energy-efficient technologies, equipment, and processes.
- We strive to increase our use of renewable energy sources and explore opportunities for on-site generation.
- We establish energy-saving targets, regularly track our progress, and report on our greenhouse gas emissions.

Water:

- We optimize our water usage by implementing water-efficient technologies and practices throughout our operations.
- We monitor and manage water consumption, ensuring responsible water use and minimizing waste.
- We support initiatives to protect local water sources and promote water conservation in the communities where we operate.

Pollution:

- We prevent and minimize local pollution by implementing pollution control activities.
- We comply with all applicable environmental laws and regulations to protect air, water, and soil.

Materials, Chemicals, and Waste:

- We prioritize the use of environmentally friendly materials.
- We implement waste reduction and recycling programs to minimize the generation of waste.
- We encourage suppliers to promote the use of sustainable materials and reduce the environmental impact of our supply chain.

Environmental Impacts from Products End-of-Life and Use of Products:

- We design and develop our products with a focus on environmental sustainability throughout their life cycle.
- We provide information and support to educate customers about the environmentally responsible use of our products via our reduce, reuse, recycle initiatives
- We actively engage with our customers to improve the environmental performance of our products.
- We explore innovative solutions for product reuse, and recycling.

Customer Health and Safety:

- We are committed to ensuring the health and safety of our customers by complying with relevant regulations and standards.
- We provide clear instructions for the safe use of our products.
- We proactively address any potential environmental or health risks associated with our products.

Promotion of Sustainable Consumption:

- We encourage sustainable consumption practices among our customers by offering environmentally friendly alternatives and providing information on their benefits.
- We raise awareness about the importance of sustainable consumption through educational campaigns and initiatives.
- We collaborate with partners, NGOs, and government agencies to promote sustainable consumption on a broader scale.

We regularly review and update this environmental policy to reflect new developments, best practices, and evolving environmental challenges. Our commitment to the environment extends to all levels of our organization, and we provide the necessary resources and training to ensure the successful implementation of this policy. By working together with our employees, customers, suppliers, and stakeholders, we can make a positive difference in protecting our planet for future generations.
